## Oxygen Equipment and Supplies

### Invacare®

#### XP02™ Portable Oxygen Concentrator

Small, lightweight, durable and clinically robust. Contemporary, non-medical design with quiet, simple operation. FAA approved for in-flight use up to 10,000 ft. Weighs just 6 pounds and incorporates a pulse dose oxygen delivery system that will keep oxygen patients saturated during all activities for daily living. Pulse dose delivery with settings 1-5. The two and a half hour battery duration (at setting 2) may be doubled to five hours through the use of an optional supplemental battery. Oxygen capacity up to 900 mL. Includes concentrator, carrying case, AC adapter, DC adapter, accessory bag and battery. Measures 10"H x 7"W x 4"D. Use with INV-MS4121 21ft oxygen tubing. 3 year limited warranty.

#### Solo2™ Transportable Oxygen Concentrator

Designed for ease of use and to meet the needs of oxygen patients in nearly any setting. Weighs just 17 pounds or just under 20 pounds with battery. Features Sensi-Pulse technology that customizes the size of each oxygen bolus to meet patient demand, adapting to the patient's oxygen needs. Offers continuous flow from 2 to 6 hour run time at up to 3 lpm and pulse dose settings 1-5. Small, quiet, and reliable; giving patients the freedom to go just about anywhere without fear of running out of oxygen. Easy-to-read control panel with no lights or codes to interpret. Battery, AC or DC operation for maximum convenience. Includes wheeled cart for easy portability. Up to 25 foot tubing recommended on continuous flow and 7 foot for pulse settings. Measures 16.5"H x 11"W x 8"D. 3 year limited warranty on concentrator, 1 year on battery and accessories.

#### Perfecto2 5-Liter Concentrator

The smallest, lightest, quietest and most energy efficient line of 5-liter concentrators ever produced by Invacare. Sleek, stylish, contemporary design. Weighs just 47 pounds and incorporates all of the best features of the market-leading Platinum XL concentrator, while significantly improving upon the key specifications. Also available with the SensO2 oxygen sensor (IRC5PO2 and RCSP02V). Sound Level: <43 dB. Oxygen: Purity: 95.6% to 87% at all flow rates. Maximum Outlet Pressure: 5 PSI (+/- 0.5 PSI). Operating Flow Rate: 0.5 - 5 lpm. Power: 280 watts. Filters: Compressor inlet, outlet HEPA, cabinet (gross particle). Electrical: 120 VAC (+/- 10%), 60 Hz. Rated Current Input: 4.0 amps average @ 5 lpm. Pressure: Relief mechanism: 35 PSI (+/- 3.5 PSI). Measures 13"W x 23"H x 11.5"D. 3-year limited warranty.

<b>INVIRC5PO2V</b>	with O2 Sensor	Ea	E1390

#### Perfecto2™ W Oxygen Concentrator

An ultra quiet version of the Perfecto2™ Oxygen Concentrator. Weighs just 45 pounds. At a sound level 60% quieter than the original and perfect for noise sensitive patients or facilities. Incorporates all of the great features of the Perfecto2 concentrator including compatibility with the HomeFill® Oxygen System. Provides energy efficiency, small size and lightweight portability. Features top handle for easy mobility. Includes alarms and safety system features such as battery free power loss alarm, Sieve-GARD™ monitors, SensO2 oxygen monitor, 35psi compressor pressure relief valve, and self diagnostics electronics. Maximum outlet pressure: 5+/-0.5 psi. Sound level at 39 dBA. Oxygen output: 95.6% to 87% purity at all flow rates. Operating flow rate 1/2-5 lpm. Power: 280 watts. Measures 13"W x 23"H x 11.5"D. 3 year limited warranty.

#### Platinum 10 Oxygen Concentrator

Compatible with the HomeFill II transfilling system. Features a spring mounted compressor, easy access to service by removing only four cabinet screws, a top handle, and a side-access door for both the inlet filter and diagnostics. Maximum Outlet Pressure: 9 +/- 0.5 PSI. Rated Current Input: 4.7 amps average @ 5 lpm. Sound Level: 58 dB average. Oxygen: Output: 95.6% to 87% at all flow rates. Operating Flow Rate: 2 - 10 lpm. Power: 585W. Pressure relief mechanism: 35 psi +/- 3.5 psi with cabinet, outlet HEPA, compressor inlet filters. Weighs just 54 pounds. Dimensions: 18-3/8"W x 26-3/8"H x 14-3/8"D. 3 year limited warranty.

#### HomeFill Ambulatory Package

HomeFill® Oxygen Compressor - The Invacare HomeFill® complete home oxygen system will revolutionize ambulatory oxygen by allowing patients to fill their own high-pressure cylinders from a concentrator. The HomeFill® is a multi-stage pump that simply and safely compresses oxygen from specially equipped Invacare 5 and 10 liter concentrators into oxygen cylinders in sizes M2, ML4, ML6, M6, M9, and D. The ability to fill their own cylinders gives ambulatory patients greater independence and freedom. Home care oxygen providers will also benefit from the virtual elimination of time-consuming and costly service calls associated with cylinder and/or liquid oxygen deliveries.

Product #		Available UOMs	HCPCS
<b>INVIOH200PC</b>		Ea	K0738

**In the United States**, about 20 million people have been diagnosed with asthma; nearly 9 million of them are children. Asthma is closely linked to allergies. Most, but not all, people with asthma have allergies. Children with a family history of allergy and asthma are more likely to have asthma.

# Oxygen Equipment and Supplies

## HomeFill Oxygen Compressor

Complete home oxygen system revolutionizes ambulatory oxygen by allowing patients to fill their own high-pressure cylinders from a concentrator. The HomeFill is a multi-stage pump that simply and safely compresses oxygen from a specially equipped Invacare 5-liter concentrator into HomeFill compatible oxygen cylinders. The ability to fill their own cylinders gives ambulatory patients

greater independence and freedom. Home care oxygen providers will also benefit from the virtual elimination of time-consuming and costly service calls associated with cylinder and-or liquid oxygen deliveries. The HomeFill ambulatory package includes the following: IOH200-HomeFill compressor, IOH260 HomeFill Ready Rack, HomeFill M9 cylinders with integrated conserver and carrying bag.

## Pneumatic Oxygen Conserver

Offers a 3.5 to 1 conserving ratio with excellent pulse dose volumes. The reliable performance will keep patients saturated while extending the time of their cylinders. CGA 870 compatible with a single lumen

system with single selector knob controls ON/OFF, liter flow and continuous flow mode. Continuous flow at 2 lpm. No batteries required and weighs less than one pound. 2 year limited warranty.

Product #	Size	Available UOMs	HCPCS
<b>INVIOC100P</b>	Standard	Ea	N/A

## Check O<sub>2</sub> Plus™ Concentrator Analyzer

An efficient and cost-effective analyzer designed with technicians in mind. It checks oxygen concentration (%), flow rate (L/min), and patient outlet pressure (psi/kPa) on any oxygen concentrator. Never needs to be calibrated, and there's no fuel cell to replace. Features simple, two button operation. 9V battery power source provides three years of typical use. Shuts off automatically to extend battery life. ±2% accuracy oxygen percentage between 73.0 - 95.6% range. Weighs 10oz. 2-year limited warranty.

Product #	Available UOMs	HCPCS
<b>INVIRC400</b>	Ea	N/A

## Unfilled Humidifier

Disposable 500ml humidifier. Meets criteria for gas humidification. (Use with O<sub>2</sub> concentrator.)

Product #	Available UOMs	HCPCS
<b>INV3260</b>	Cs50	N/A

## Disposable Nasal Oxygen Cannula

Delivers safe, low/moderate concentrations of oxygen for extended periods of time. Curved, non-flared tip. Comes with 7' kink-resistant supply tubing.

Product #	Available UOMs	HCPCS
<b>INVMS3120</b>	Ea,Cs50	N/A

## Oxygen Tubing Connector

Used to connect longer lengths of tubing either together or to a nasal cannula to allow more freedom of movement without interrupting oxygen flow.

Product #	Available UOMs	HCPCS
<b>INVMS4301</b>	Pk50	N/A

## Spectro2™ Pulse Oximeter

Affordable, dependable and easy to use. A low cost, spot check device displaying SpO<sub>2</sub>, pulse rate, signal strength and Pulse amplitude index(PI). Large, bright, easy-to-read LED display for at-a-glance patient assessment and easy to view from wide angles. Comfortable ergonomic design allows easy one-handed operation. On-board sensor storage cradle stores and protects finger sensor, reducing damage and minimizing replacement costs. Can be used with optional docking station(WW1025SYS) and optional attachable printer (WW1026SYS) to turn hand-held unit into printing oximeter. 50% larger LED display than comparable hand-held devices. Multiple power options including battery, AC adapter and USB cable. 3 year limited warranty.

Product #	Available UOMs	HCPCS
<b>INVWW1000EN</b>	Ea	N/A

## Digit® Finger Pulse Oximeter

Pocket-size pulse oximeter is a convenient and economical solution to fast, reliable SpO<sub>2</sub>, pulse rate and pulse strength measurements. Its compact size is ideal for home use. Large LED display allows for use in a wide range of light

and dark environments. 2 AAA cell batteries (included) provide power for 1,400 spot-checks. Auto power shutdown after 8 seconds when not in use conserves batteries. Low battery indicator flashes when 30 minutes of battery time remains. Also includes lanyard. 1.7"H x 2.25"W x 1.5"D. 1-year warranty.

Product #	Available UOMs	HCPCS

## CareFusion Respiratory Care

### AirLife™ Aerosol Mask

Soft, high-quality disposable aerosol masks are made from high-grade resins. Provides cool, lightweight comfort and reduces irritation points; designed for anatomical compatibility.

Product #	Size	Available UOMs	HCPCS
<b>BAX001206</b>	Adult	Ea,Cs50	A7015
<b>BAX001263</b>	Pediatric	Ea,Cs50	A7015

### AirLife Adult Oxygen Mask with 7ft Tubing

Made from soft, high-grade vinyl resins. The smooth, feathered edges are designed for patient comfort while reducing irritation points. Designed for anatomical compatibility.

Product #	Available UOMs	HCPCS
<b>BAX001201</b>	Ea,Cs50	N/A

### Flutter® Mucus Removal Device

Portable and easy to use for those with asthma or COPD; promotes removal of harmful secretions from patient airways with mucus-producing respiratory conditions. Features PEP or positive expiratory pressure which helps hold airways open, airway oscillation which helps vibrate mucus away from airway walls, and intermittent flow acceleration which helps push mucus upward for exportation.

Product #	Available UOMs	HCPCS
<b>BAXSCA930</b>	Ea	N/A

### Cushion Nasal Adult Cannula

Features a soft, clear design that provides optimum patient comfort. Crush-resistant to prevent occlusion and kinking.

Product #	Length	Available UOMs	HCPCS
<b>BAX002600</b>	with 7' Tubing	Ea,Cs50	N/A

### Oxygen Tubing

<b>BAX001427</b>	100' Blue tubing, segmented every 6"	Ea	A7010

\*Special Order Item

**When your asthma symptoms become worse than usual**, it is called an asthma episode or attack. During an asthma attack, muscles around the airways tighten up, making the airways narrower so less air flows through. Inflammation increases, and the airways become more swollen and even narrower. Cells in the airways may also make more mucus than usual. This extra mucus also narrows the airways. These changes make it harder to breathe.

From the National Heart Lung and Blood Institute

# Oxygen Equipment and Supplies

**Adult Single-Limb Portable Ventilator Circuits**  
Adult single-limb circuits for Life Products LP4™, LP5™, Aequitron LP6™, LP6 Plus™, LP10™, and Lifecare™ PLV®-100 and PLV®-102 ventilators. Includes 6" patient tube and trach elbow adapter, 15mm I.D.; 60" patient air tube; 70" exhalation supply line, 0.137" I.D.; 70" pressure sensing line, 0.200" I.D., and tip adapter; 189" cascade tube and elbow adapter, 22mm I.D., silicone diaphragm.

<b>BAXRT114</b>	60'	Ea, Cs10	N/A

**AirLife™ AirX™ Incentive Spirometer**  
Disposable and designed for exercising and measurement of volume flow. Pre- and postoperative patients increase lung volume by keeping the instrument's inhalation-sensitive ball suspended with inhalation. Flow passages vary in diameter, affecting the energy required to raise the ball, which stays suspended as long as the patient maintains this effort. Flow indicator dial can be adjusted to indicate flow rates in ml/second.

Product #	Available UOMs	HCPCS
<b>BAX001900</b>	Ea, Cs20	N/A

**AirLife™ Volumetric Incentive Spirometer**  
Adjustable goal indicator provides a volumetric guideline for adequate lung exercise. Dual-sided calibrations allow clear, legible identification of volumes. Inspiratory indicator encourages patients to maintain an appropriate rate of inspiration. Constructed of sturdy plastic and compact for convenient use and storage.

## Chad Therapeutics

### Bonsai® Pneumatic Conservor

Delivers up to 6:1 increase in usage time over continuous flow to last more than six times longer than a cylinder used without a conserving device. One of the smallest and lightest conservers available at just 9.7 ounces for extended ambulation with minimum weight and bulk. Offers 1-7

lpm flow equivalency settings. Delivers fixed pulses of oxygen within the first 150 milliseconds of inspiration and utilizes a standard, single-lumen cannula. Clinically determined delivery pattern and bolus size to ensure patient saturation up to 40 breaths per minute. Simple patient operation with one control knob that does it all. NON-adjustable continuous flow setting of 2 lpm. Rugged, durable aluminum and nylon construction. Required operating pressure of 200 psi to 3000 psi. 2-year warranty.

### OxiMax™ Single-Patient-Use, Adhesive Sensors

OxiMax™ adhesive sensors are highly accurate and feature tear-resistant bandages that provide a comfortable, secure "second-skin" fit. The bandages are also designed to prevent ambient light from interfering with SpO2 readings. This group of sensors can be used with OxiMax™-compatible monitors as well as earlier-generation Nellcor™ pulse oximetry, making it easy to transition to OxiMax™ pulse oximetry. However, certain OxiMax™-specific features are not accessible when the sensors are used with older, non-OxiMax™ monitors. Sensors that talk to you providing caregivers with sensor application tips. Clinicians can use the Sensor Event Report function to quickly review alarm events that occurred while the sensor was on the patient. 1-year warranty.

## US Pharmacal

### Cann-Ease Nasal Moisturizer

The original nasal moisturizer designed specifically for people on oxygen therapy, via nasal cannula and/or CPAP/BIPAP mask, who suffer from dry nasal passages. Works on contact and provides immediate relief. Improves patient compliance and alleviates irritation caused by friction from cannula. Clear, water based gel contains no animal oils, natural oils, scents, petroleum based products, silicone or emulsifiers, is non-greasy and non-odorous. Hypoallergenic.

Contains Aloe Vera gel for protection from dryness and irritation; Allantoin to increase the water binding capacity of skin; d-Pantothanol to resist further membrane damage and speed healing. May also be used by sufferers from dry nasal passages caused by low humidity, nasal drying medications, allergy remedies and dry, cracked lips.

## CPAP

### Invacare®

#### Twilight™ II Nasal Mask

Comfort is inherent in the design. Features solid mask shell with a comfortable and flexible silicone nasal cushion available in 3 sizes, (larger cushion is deeper and can accommodate more height and width). Whisper quiet operation. Use the headgear as forehead support to reduce irritation and allow for greater distribution of pressure across a larger surface. Headgear attaches to forehead adjustment and clips to two points on the mask shell. Clips prevent the mask from unintentionally disconnecting while patient is sleeping. Main swivel quietly rotates 360 degrees with acetal tubing that prevents squeaking when rotated. Includes mask shell, nasal cushion, 4 clips and headgear. Kit includes standard mask, small and large cushion, 4 quick clips and headgear. Latex-free. 90 day warranty.

### Fisher & Paykel Healthcare

#### Acclaim™ 2 Nasal Mask for CPAP and Bi-level Ventilation

Packaged with all sizes to simplify patient set-up and reduce homecare dealer inventory. Features a unique glider mechanism that eliminates side-to-side leaks by allowing the headgear to move freely while the mask cushion stays in place. The redesigned T piece has an optional locking position, which reduces pressure on the bridge of the nose. The foam and silicone seal deliver unmatched comfort. The diffuser removes draft and helps make the Acclaim 2 one of the quietest nasal masks on the market today. Breathoprene™ headgear has been added to keep the Acclaim 2 cool and lightweight when in use.

<b>FPKHC401A</b>	Ea	A7034 + A7035

#### HC150 Heated Humidifier with Ambient Tracking™

Upgrades FPK900HC007 Starter Kit from cool pass-over to heated humidification, which results in more comfort and increased patient compliance. Features Ambient Tracking™ that continuously senses changes in room temperature and alters the heater plate temperature accordingly to minimize condensation and maximize humidity. The patient receives the benefits of heated humidification without the annoying issues related to excess condensation in the tubing. Can be used with a DC-AC inverter, which enables truck drivers, campers or those who live in remote areas to benefit from heated humidification. Can be purchased separately or with FPK900HC105 Humidification Starter Kit. 2.6" x 5.3" x 5.9". 115VAC. Weighs just 1.8lbs. 1-year warranty.

## CPAP / Nebulizers and Compressors

**SleepStyle™ 200 CPAP Series**  
Delivers sleep performance through improved clinical, patient care and commercial results. Model HC231 (hour meter) starts as a standard CPAP, but may be converted to a fully integrated CPAP with heated or cool humidification with the purchase of a conversion kit. Model HC233 (hour meter) starts as a fully integrated CPAP with built in heated humidification.

Both models feature Ambient Tracking® Plus

auto-adjusting humidification technology, altitude adjustment, switch mode power supply, and a 3 to 20cm H<sub>2</sub>O pressure range. SleepStyle™ 200 CPAP Series pack includes: carry bag, breathing tube, 2x water chamber, air filter, and water funnel.

## Nebulizers & Compressors

### Invacare®

#### Stratos Compact Aerosol Compressor

Offers durability, economy, and performance in a stylish design. It is small enough to fit in a square foot desktop space, yet powerful enough to deliver a fast and effective aerosol treatment (typical treatment time 7-9 minutes). Includes one reusable nebulizer. Features disposable, rayon fiber inlet filter for simple, cost-effective maintenance and a nebulizer parking post. Operating pressure: 11-16psi (typical), 33psi (max). Operating flow rate: 4-8 lpm. Product weight: 3.2lbs. 5-year limited warranty.

Product #	Dimensions	Available UOMs	HCPCS
<b>INVIRC1710</b>	5.9" L x 5.7" W x 3.7" H	Ea	E0570

#### Select Aerosol Compressor

A standard compressor packaged with a disposable nebulizer, designed to meet today's performance and price requirements. Built-in handle that is easy to operate. Maximum compressor pressure at 36 PSI. Typical operating pressure range from 11-16 PSI. Typical operating flow rate from 4-8 lpm. Weighs just 3.2 pounds. UL listed. 3 year limited warranty.

Product #	Dimensions	Available UOMs	HCPCS
<b>INVIRC1705</b>	6" L x 4.5" W x 3.5" H	Ea	A7005

#### Stratos Portable Plus Aerosol Compressor

Sleek, portable compressor that will offer speed, ease of use and stylish design in one compact package. Small enough to fit in the palm of your hand, it is ideal for those who desire mobility, expediency and efficiency in an aerosol delivery device. Powerful enough to drive a standard nebulizer. Includes one reusable nebulizer and carrying case. Small size, quiet operation and battery pack (sold separately) allows the unit to be used almost anywhere. Can be powered using the AC power cord in a wall outlet, using the DC adapter in a car, or using the optional battery pack. Weighs less than a pound (1.38lb with battery pack). Maximum compressor pressure at 29 PSI. Maximum flow rate at 8 lpm. Noise level at 58 dBA. 3 year limited warranty. UL listed.

### PulmoMate™ Compressor/Nebulizer

Complete with impressive standard features including custom-built metal head for durability and three-prong plug for low voltage protection. UL rating label. Includes Micro-Mist™ nebulizer. Maximum compressor pressure 35PSI and free air flow at 8 lpm. Sound level at 53dBA. 3-year warranty.

Product #	Dimensions	Available UOMs	HCPCS
<b>DEV4650D</b>	3.8"H x 7"W x 13"D	Ea	E0570

### VixOne™ Disposable Nebulizer

The VixOne is the economical choice in small-volume nebulizers. Comfortable mouthpiece design. Highly efficient, latex free, and designed for ease of use, allowing medication to be added without opening the neb cup and standard fittings accommodate most manufacturers' masks. Respirable fraction 84% below 5 microns. At least 18% more medication delivered than with a traditional open system. Low residual volume (0.7cc) reduces medication waste. High-capacity medication bowl (>10cc) accommodates varying therapy protocols. Nebulizes in upright position or at angles up to 45°, allowing patients to receive treatment in their most comfortable position. Universal connector accommodates standard adult and pediatric masks as well as the PediNeb™ pediatric pacifier mouth piece. Anti-spill tee design provides secure seal with simple ¼ turn assembly design. 7' kink-resistant Flexhose tubing.

## Invacare® Supply Group

#### Invacare® Disposable Tracheostomy Tube Holder

Soft, hypo-allergenic 100% cotton flannel that wicks moisture away from the skin, evaporating through the loop backing; preventing irritation and skin breakdown by allowing air to flow thru to skin. Fabric integrity will not stretch, pull or "rope" digging into neck. 1" width will not roll-over or fold. Closed seams on edges of flannel neckband for reduced

sponge effect of foam laminate keeping moisture out of trach tie. Thicker foam padding for maximum comfort and less pain. FlexPiece for cough reflex that allows for edema & cough reflex and "Flex" for weight of Vent Circuitry. Two piece adjustable neckband for universal sizing that is easily adjusted to any size patient with the help of secure Velcro® tabs. Latex-free.

Available Product #	UOMs	HCPCS

## Teleflex Medical

### Aqua Plus Flex Disposable Hygroscopic Condenser Humidifier

The AQUA+ HCH incorporates the latest advances in material technology to provide humidifiers with optimal moisture output, minimal dead space and low resistance to flow. The filtered units have a bacterial/viral filtration efficiency of 99.99% helping reduce the risk of cross-contamination. All AQUA+ HCHs are individually packaged. AQUA+ HCH line utilizes a fiber-free, cellular hygroscopically treated media, and is available in a variety of configurations to meet a wide range of clinical needs. One-piece construction with flexible tubing aids in patient positioning.

### Shiley® Pediatric/Neonatal Tracheostomy Tubes

Soft flange material for comfort and features a lower flange angle to improve fit in infant patients. The Pediatric Tracheostomy Tube (PED) has a recessed area behind the connector and soft flange material to provide greater comfort and fit for pediatric patients. The Long Pediatric Tracheostomy Tube (PDL) offers a longer cannula and soft flange material to fit larger pediatric patients. Each neonatal and pediatric tracheostomy tube comes with its own obturator. Smooth, rounded-tip obturator facilitates insertion. Designed for use to bypass upper airway obstructions, provide long term ventilation, support and/or manage tracheal/bronchial secretions.

## Tracheal Care / Shiley Tracheostomy Tubes

### Shiley® Disposable Cannula Cuffless Tracheostomy Tube

Provides convenience of a disposable inner cannula for a wide variety of applications. Disposable design minimizes risk of cross-contamination and helps protect healthcare workers.

Disposable Inner Cannula (DIC) features integral 15mm snap-lock connector for quick, safe disposal after single use. Smooth, rounded-tip obturator facilitates insertion. Disposable Decannulation Plug (DDCP) closes the proximal end of the DCFS and DCFN to permit breathing through fenestration and upper airway. Designed for use to bypass upper airway obstructions, provide long term ventilation, support and/or manage tracheal/bronchial secretions.

Product #	Size	O.D.	I.D.	Length	Available UOMs	HCPCS
<b>MAL4DCFS</b>	4	9.4mm	5.0mm	62mm	Ea	A7520
<b>MAL6DCFS</b>	6	10.8mm	6.4mm	74mm	Ea	A7520
<b>MAL8DCFS</b>	8	12.2mm	7.6mm	79mm	Ea	A7520

### Shiley® Disposable Cannula Cuffless Fenestrated Tracheostomy Tube

Offers convenience of inner cannula disposability, while permitting patient to breathe through upper airway if desired. Disposable Inner Cannula (DIC) features integral 15mm snap-lock

connector for quick, safe disposal after single use. Smooth, rounded-tip obturator facilitates insertion. Disposable Decannulation Plug (DDCP) closes the proximal end of the DCFS and DCFN to permit breathing through fenestration and upper airway. Designed for use to bypass upper airway obstructions, provide long term ventilation, support and/or manage tracheal/bronchial secretions.

Product #	Size	O.D.	I.D.	Length	Available UOMs	HCPCS
<b>MAL4DCFN</b>	4	9.4mm	5.0mm	62mm	Ea	A7520
<b>MAL6DCFN</b>	6	10.8mm	6.4mm	74mm	Ea	A7520
<b>MAL8DCFN</b>	8	12.2mm	7.6mm	79mm	Ea	A7520

### Shiley® Reusable Cannula Cuffless Fenestrated Tracheostomy Tubes

Designed for pulmonary hygiene and when used in conjunction with the Decannulation Plug (DCP), directs breathing through the upper airway. Fenestrated inner cannula aids weaning and speaking. Inner cannula with

integral 15mm twist-lock connector permits connection of ancillary equipment and is translucent for easy inspection. Smooth, rounded-tip obturator facilitates insertion. Low profile inner cannula minimizes tube profile for long term care. Swivel neck flanges improve patient comfort. Designed for use to bypass upper airway obstructions, provide long term ventilation, support and/or manage tracheal/bronchial secretions.

Product #	Size	O.D.	I.D.	Length	Available UOMs	HCPCS
<b>MAL4CFN</b>	4	9.4mm	5.0mm	65mm	Ea	A7520

<b>MAL8CFN</b>	8	12.2mm	7.6mm	81mm	Ea	A7520

### Shiley® Low Pressure Cuffed Tracheostomy Tube

Manufactured of high quality, compliant material that softens at body temperature. Low-pressure cylinder cuff helps to protect sensitive tissue. Smooth, rounded-tip obturator facilitates insertion. Decannulation Plug (DCP) connects to outer cannula to permit upper airway breathing. Inner cannula with integral 15mm twist-lock connector permits connection of ancillary equipment and

can be cleaned to maintain airway patency. Smooth, rounded-tip obturator facilitates insertion. Fenestrated Inner Cannula with green 15mm connector and white 15mm cap is used for upper airway breathing. Designed for use to bypass upper airway obstructions, provide long term ventilation, support and/or manage tracheal/bronchial secretions.

### Phonate™ Speaking Valve

Lightweight, medical-grade, plastic valve designed for tracheostomy patients to direct airflow past the vocal chords, giving them the ability to speak. Without oxygen port.

Product #	Available UOMs	HCPCS
<b>MALSSV</b>	Ea	L8501

### Tracheolife II

Compact and lightweight single use heat and moisture exchanger (HME) device for tracheostomy. Allows the combination of high humidification efficiency with long term effectiveness. Small collection chamber into which sputum deposits without compromising functionality, and central ports through which suctioning and sampling may be performed without removing the device with HME element made of cellulose. Oxygen port is positioned to allow heating and humidification of all inspired gases.

Product #	Available UOMs	HCPCS
<b>MAL353U19004</b>	Ea, Bx25	A7509

### Tracheostomy Tube Holder

One size adjusts to fit most patients from pediatric to adults with neck size to 18". Made of latex-free, foam-padded cotton for patient comfort. Velcro® hooks attach easily to tracheostomy tube neck flange. Wide band tapers at hooks to reduce excess secretion accumulation. Soft materials and wide band promote better skin care. Designed for single patient use.

## Additional Products

### Acapella® Vibratory Valve

Combines the benefits of both PEP therapy and airway vibrations to mobilize pulmonary secretions for spatial orientation. Improves clearance of secretions, easier to tolerate than CPT and takes less than half the time of conventional CPT sessions. Facilitates opening of airways in patients with lung diseases with secretory problems (COPD, asthma, Cystic Fibrosis). Color-coded units (green for high-flow, blue for low-flow) or Acapella(r) duet

vibratory PEP therapy system with a nebulizer. Acapella® Choice vibratory PEP products are easily disassembled and reassembled for effortless cleaning. You can adjust acapella's frequency and flow resistance simply by turning an adjustment dial. Can accommodate virtually any patient's lung capacity. Allows inhalation and exhalation without removing from mouth. May be used with mask or mouthpiece Nebulizer. Latex-free.
